ELSEVIER

Cognition 61 (1996) 321–322

COGNITION

Contents of Volume 61

Numbers 1–2

MICHAEL R. BRENT (*Johns Hopkins University*)
Advances in the computational study of language acquisition, 1–37

JEFFREY MARK SISKIND (*Technion*)
A computational study of cross-situational techniques for learning word-to-meaning mappings, 39–91

MICHAEL R. BRENT and TIMOTHY A. CARTWRIGHT (*Johns Hopkins University*)
Distributional regularity and phonotactic constraints are useful for segmentation, 93–125

PHILIP RESNIK (*Sun Microsystems Laboratories*)
Selectional constraints: an information-theoretic model and its computational realization, 127–159

PARTHA NIYOGI and ROBERT C. BERWICK (*Massachusetts Institute of Technology*)
A language learning model for finite parameter spaces, 161–193

Number 3

LINDA HERMER and ELIZABETH SPELKE (*Cornell University*)
Modularity and development: the case of spatial reorientation, 195–232

PAUL L. HARRIS, TIM GERMAN and PATRICK MILLS (*University of Oxford*)
Children's use of counterfactual thinking in causal reasoning, 233–259

GABRIELLA VIGLIOCCO (*University of Trieste*), BRIAN BUTTERWORTH (*University College London*) and MERRILL F. GARRETT (*University of Arizona*)
Subject–verb agreement in Spanish and English: Differences in the role of conceptual constraints, 261–298

KIM PLUNKETT (*Oxford University*) and VIRGINIA A. MARCHMAN (*University of Wisconsin*)
Learning from a connectionist model of the acquisition of the English past tense, 299–308

RAYMOND W. GIBBS Jr. (*University of California*)
Why many concepts are metaphorical, 309–319

Contents of Volume 61, 321
